**Subject:** NCEA Interagency Communication 273 - RDX: Notification of availability of courtesy redline copies

**Date Sent:** February 24, 2016

**Action:** Two-week courtesy redline (*response not required*)

**Documents:** Public comment draft Toxicological Review (clean and compare to IASC draft); public comment draft Supplemental Information (clean and compare to IASC draft); public comment draft charge (clean and compare to IASC draft)

**Purpose of Communication:** Two-week courtesy copy prior to public release

**Due Date for Comments:** n/a – Major concerns should be communicated to us as soon as possible

Dear Interagency Colleagues,

As mentioned in our February 11, 2016 message (NCEA Interagency Communication #272), we are providing courtesy redline-strikeout versions of the draft Toxicological Review of Hexahydro-1,3,5-trinitro-1,3,5-triazine (RDX), Supplemental Information, and draft charge questions for the 2-week courtesy redline period. The RDX interagency science consultation meeting was held December 4, 2014.

**Deliberative Process / Ex. 5**

**Deliberative Process / Ex. 5**

**Deliberative Process / Ex. 5**

**Deliberative Process / Ex. 5**

Given the length of time since the interagency review meeting and to help facilitate your review, we are providing a list of the major changes to the RDX documents since the December, 2014 interagency review meeting:

**Deliberative Process / Ex. 5**

**Deliberative Process / Ex. 5**

Two versions of the RDX Toxicological review and Supplemental Information document are attached – a redline version showing changes made since you last saw the assessment and a “clean” version. The draft external peer review charge

is also attached. As part of EPA's migration to a new website structure, the former password-protected interagency website is no longer available. We are exploring additional ways of providing a similar resource for sharing drafts of future assessments with the interagency reviewers. In the meantime, if you are unable to access the files attached to this email, please contact me and we will find another method of getting you the documents.

As a reminder, citations are linked to EPA's HERO (Health and Environmental Research Online) database, which provides bibliographic information and abstracts for all references cited in the Toxicological Review. Additionally, you have been given access to HERONet, which allows you to view the full-text studies and reports used in the assessment.

If you have any questions, please contact me at [jones.samantha@epa.gov](mailto:jones.samantha@epa.gov) or 703-347-8580.

Thanks,  
Samantha

Samantha J. Jones, Ph.D
